"e-Synergy is a different way of thinking; a different way of interacting with your core constituencies...

When I saw what it could do, I was blown away by what a complete package it was."

—Sharon Dill, PADI Americas

e-Synergy = Business Unified

Exact software ®

Exact software

e-Synergy® = Business Unified™

"Only when you have total control over your entire business process can you truly focus on delivering value to the customer, and reaping competitive advantage and rewards."

## Business Unified = Advantage Realized

Exact e-Synergy® unites the workplace and reveals the costs, inefficiencies and redundancies hidden by the complexities of your business.

e-Synergy, from Exact Software™, provides a Web-based Business Process Management solution that connects the people, processes and knowledge that matter most to your business. By creating a real-time, accurate view of the organization's personnel, financials, workflow, documents and asset information, businesses can obtain control over their operations, enhancing decision-making, analysis and scenario planning.

With Exact e-Synergy, your entire "value chain" can obtain a portal view into the workplace: including employees, business partners, suppliers and customers.

Benefit from e-Synergy is derived by its emphasis on the importance of the whole business, as well as the interdependence of its parts. The e-Synergy solution integrates and captures corporate data within a single database, allowing all members of the value chain to view and act on this data, based on their access and roles within the system.

e-Synergy: One central solution that stores, controls and manages all your workplace information.

e-Synergy Model

With Exact e-Synergy, information is accessible to everyone via the product's Web-based portal. Both internal and external parties can access e-Synergy to perform critical tasks. Security controls ensure that only those allowed to access certain information will be able to view it. With e-Synergy, an organization is able to manage its entire value chain, on one solution and one database.

Midsize Business Control

In today's world, advanced technology is widely used in global enterprises to solve important business problems and improve productivity. Now, e-Synergy provides these same benefits to midsize businesses, enabling them to better understand their organization and make more informed operational decisions. e-Synergy delivers a complete solution suite to analyze, report, manage, and operate your business.

- **Workflow Management** tells you what everyone is doing, all the time

- **Web-based Project Management** enables team members to contribute via the Internet

- **Complete Relationship Control** including Customer Relationship Management (CRM), Supply Chain Management and Partner Relationship Management

- **Web Shop** includes intuitive online cataloging and inventory control, enabling seamless e-Commerce ordering over the Internet

- **Document and Knowledge Management**, including content management for all portals and Websites

- **Consolidated, real-time Financial Management**, Budgeting and Reporting

- **Human Resource Management**, including organization, salary, rollups and workflow reporting

- **Anywhere, anytime access** via the Internet, including your favorite wireless handheld device

Business Unified

Within any organization there is an information chain that forms intelligence around the people and the knowledge that they provide. Traditional software only handles this information in pieces, failing to address the many connections in workplace data.

e-Synergy makes those connections and creates a real-time environment for employees and managers to store, see and share all their work, resulting in higher performing organizations.

Complete Corporate View

e-Synergy's powerful integration capabilities provide a clear picture of major cost savings and operational efficiencies across your entire organization.

Automated Security

e-Synergy streamlines workflow and replaces manual, unsecured processes, with an environment of security, roles and rules based access. Business managers can control access to data on a need-to-know and need-to-access basis for projects and outside-managed operations.

Real-Time Access

With e-Synergy, you can manipulate hundreds of pre-defined real-time report "views" over the Internet or create your own, to understand every aspect of your business!

To learn how e-Synergy will enhance your productivity and unveil hidden ROI call 1.800.468.0834 or visit www.exactamerica.com/esynergy.
