

Simplicity

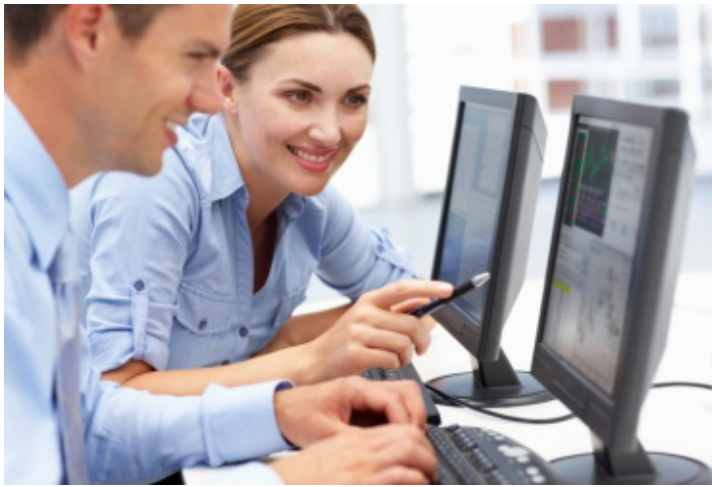

Simplified Deployment & Management

"There's nothing to manage. That's one of the great benefits of this appliance. I have not had to manage anything. It's a very simple product to use."

-Ken Adams, CIO
Miles & Stockbridge, law firm

Most Virtual Desktop Infrastructure (VDI) technologies demand large amounts of time and effort from your IT resources. They are expensive, cumbersome, and deliver a poor end-user experience.

In contrast, iPro IT's V3 VDI Solution takes only a few hours to deploy, greatly improves the end-user experience, costs a fraction of what you would spend on other VDI systems, and continues to save you money through time by extending the refresh cycle of your desktop infrastructure.

Comparing Traditional VDI Versus V3 VDI Solution

Traditional VDI

- Lengthy, complex, costly, disruptive, and unpredictable install
- Poor user experience
- Complex storage infrastructure requirements
- Burdensome administration, management, and training requirements
- Vulnerability to outages
- Unpredictable cost of scalability

V3 VDI Solution

- Appliances arrive pre-provisioned enabling installation in hours, not days
- V3 Solution eliminates latency
- V3's DCO management software simplifies administration and training
- Local pools/storage and replication maximize uptime and business continuity
- Integrated storage eliminates costly and unpredictable computer and SAN upgrades

iPro IT's award-winning VDI Solution offers your enterprise simplicity of deployment and management. Contact us for more information on how our V3 virtualized desktop infrastructure can help you reach the next level today.
